

ONE SCHOOLS NETWORK

This journey showcases the One Schools Network of schools who utilise collaboration technologies to powerfully connect learners and their teachers.

KEY FOCUS POINTS

This project has a focus on developing high quality, integrated multi-stage units of work across the key learning areas (KLAs) of science, history and geography with elements of other KLAs. This has all been possible through innovative online collaborations which has resulted in connected learners across rural and remote NSW.

MILESTONES

2015

- Cross school video conferences where students shared weekly news items
- Staff collaborated towards a unit of work on dinosaurs via shared work samples, school visits and excursions.

- Continuation on collaborative unit of work, weekly video conferences, school visits and combined excursions continued
- More schools were invited to join the One Schools network
- An integrated scope & sequence for History/Science/Geography was developed
- 4 schools now made up the One Schools network! Units of work were analysed by curriculum experts.

2016
